

Bio-Diuretic is useful for eliminating retained water which occurs during pregnancy, during monthly periods, or during periods when people may be confined to bed due to sickness and injury or confined to a wheel chair. Water may also be retained when the kidneys are not functioning properly or if the metabolism is impaired.

Bio-Diuretic is an herbal diuretic with camellia sinensis, asparagus root, dandelion root, and oat straw. In a base of cleavers, couch grass, cubeb berries, agrimony, and gravel root.

Brings Balance

Agrimony acts by stimulating the excretion of excess water and toxins while calming the liver, gallbladder, lungs, colon, kidneys, intestines, urogenital organs, pancreas, stomach and blood.

Asparagus increases cellular activity in the kidneys, and helps clear the bowels by adding undigested fiber to fecal bulk. This nutrient-dense herb contains a variety of constituents, including potassium, fiber, vitamin B6, vitamin A, vitamin C, and thiamin, and is also high in folic acid, which is essential for the body to produce new red blood cells.

Camellia Sinensis, commonly ingested as a tea, is known for its detoxifying properties and has been used for centuries to sooth and nourish the digestive system.

Cleavers is best known as a tonic for the lymphatic system. It is helpful with dry skin conditions, and has been used to treat cystitis and other urinary conditions.

Couch Grass can be used to treat urinary infections, and can also help soothe inflammation and irritation. Couch grass is a natural diuretic that can be used to help urinary tract infections, and can stimulate urine discharge and help pass kidney stones.

Cubeb Berry has been shown to be effective in treating digestive ailments and dysentery.

Dandelion has been used for centuries to purify the blood and flush toxins out of the body by way of the liver and kidneys. It promotes bile flow and can help indigestion caused by insufficient bile production. The dried herb contains potassium, which acts as a diuretic and replaces the potassium needed to prevent cramps and edema.

Gravel Root is used to treat kidney stones, prostate gland problems, rheumatism, and gout, and is also been known to help with urinary infections, such as cystitis and urethritis.

Oat Straw helps minimize fluid retention, and nourishes and supports the nervous system. It is also a concentrated source of silica (silicon dioxide), which helps build healthy skin, nails, hair, and bones.

Supplement Facts		
Serving Size: 1 Capsule		
Servings per Container: 90		
	Amount Per Serving	% Daily Value
Calories	5	<1%
Total Carbohydrates	0.5 g	<1%
Camellia Sinensis (leaf)	250 mg	**
